## We build. Digital. Shapers.

### WORK WITH US – MENTORS WANTED

#### Who we are

TechLabs' mission is to offer students a platform to acquire state-of-the-art tech-skills in the fields of Data Science, Artificial Intelligence and Web Development through blended learning. The concept was originally developed in Münster, Germany in late 2017. Since then, we have won the prestigious Google Impact Challenge Germany, educated more than 150 tech-enthusiastic students and opened a location in Barcelona. Our vision is to become Europe's most impactful learning accelerator and to contribute as much as possible to overcome the digital challenges of our time. It's time to expand to Copenhagen!

Our validated and successful concept combines the best online courses with a social community - consisting of local experts and exciting business partners, in which new tech talents have perfect conditions to flourish. And therefore, we need you! As a TechLabs mentor you make an important contribution to our unique ecosystem by sharing your knowledge with tech-enthusiastic students and supporting them in applying theoretical knowledge in hands-on projects.

#### What we offer

- As a TechLabs mentor, you will be part of our ambitious tech community and are welcome to participate in our regular meetings, such as talks, workshops or socials, in which you might even learn something yourself.
- You get to know interesting people and can expand your network among curious students and experienced professionals who want to make a difference.
- You will be presented on our website's mentor section and receive the official "Digital Enabler Certificate" – so you can associate yourself with TechLabs and benefit from its international awareness and growth.

#### What we are looking for

- You are an expert in either Data Science, Artificial Intelligence or Web Development.
- You support our mission and want to educate the next generation of techies.
- You love to share your experience with young tech enthusiasts and are willing to assist them in the realization of hands-on projects (~ 3 h / week)
- You are thrilled to have an impact and can't wait to grow with us?
